Aspiring Computer Science Engineer with a strong interest in Artificial Intelligence, Machine Learning, and Cybersecurity. Currently pursuing B.Tech in Computer Science and Engineering at Manipal Institute of Technology, Bangalore. Eager to leverage technical expertise, leadership skills, and creative problem-solving to develop secure and innovative AI-driven solutions.

Education

Manipal Institute of Technology, Bangalore

B.Tech – Computer Science Engineering

June 2025 – Present (Freshman Year)

- Relevant Coursework: Calculus, Linear Algebra, Introduction to Programming, Cybersecurity Fundamentals
- Aspirations: Artificial Intelligence, Machine Learning, Cybersecurity

Bangalore International Academy, Bangalore (2022 – 2024)

Class XI & XII (CBSE)

- Subjects: Physics, Chemistry, Mathematics, Biology

Bishop Cotton Boys' School, Bangalore (2010 – 2022)

Class I – X (ICSE)

- Recognized for academic excellence and leadership in extracurriculars
-

Programming & Technical Skills

- Fundamentals of Python

- Intermediate C
- Front-end & website development using AI tools
- Log inspection
- Data modelling and analysis
- Basics of Tableau

Technical Experience

- Developed the official website for **Code AI '26 Conference (MIT Bangalore)** as part of ACM SIG-SOFT(Executive member).
- Completed job simulations:
 1. Cyber Security Essentials – Linux Foundation
 2. Cyber Security Analyst Simulation – TCS
 3. Cyber Security Job Simulation – Mastercard
 4. Robotics & Control Simulation – Johnson & Johnson
 5. Cybersecurity & Data Analytics – Deloitte

Soft Skills

Adaptability • Persuasive Communication • Teamwork • Leadership • Creative Problem-Solving

Other

Model UN Diplomacy • Debating • Dramatics • Analytical Thinking

Projects

Aviation Weather Data Viewer (AWDV)

Solo Project — Honeywell Hackspace Hackathon (Top 25 / 220+ teams)

Tech: HTML, CSS, JavaScript, Leaflet.js, Chart.js, Python

- Developed a real-time aviation weather tool integrating METAR/TAF feeds (5-minute updates).
 - Implemented a rule-based risk scoring engine (GO / CAUTION / NO-GO).
 - Built dashboards for wind, visibility, turbulence, icing, and SIGMET alerts.
 - Delivered complete end-to-end architecture; ranked Top 25 for innovation.
-

UDAY – Unified Dropout Analysis for Youth

Team Project — Smart India Hackathon 2025 (Internal Winners moved to Regional Rounds)

Tech: Python, ML, Flask/Django, HTML, CSS, JS, Excel Automation

- Developing an AI-powered platform to predict dropout risk from attendance, performance, and trends.
 - Built four multilingual dashboards (Admin, Teacher, Student, Parent) with support for English, Hindi, Kannada, and Marwari.
 - Implemented model training, attendance and assignment workflows, progress tracking, and notifications.
 - Added dual Excel ingestion methods and a student mental-health chatbot.
 - Judges were impressed and recommended implementing the solution in our own college.
 - Selected to represent the institution at SIH Regional Rounds.
-

SEUS – Security & Early Warning System

Solo Project — Synchronize 2021 (1st Position, E-Tron)

Tech: Arduino Uno, Sensors, TinkerLabs

- Built a modular safety system: gas leakage detection, perimeter breach alerts, automated water dispensing.
 - Integrated sensor-based triggers for early warnings and safety responses.
 - Simulated and validated the system end-to-end using TinkerLabs.
 - Designed as a low-cost automation solution for small facilities.
-

Extracurricular Activities

Leading Flight Cadet — NCC Air Wing (2020 – 2021)

- Led cadet teams in air-wing activities, drills, and training sessions.
- Built discipline, leadership, and team coordination.

Model United Nations (MUN)

- Authored resolution papers on global peace and cybersecurity.
- Formed coalitions through persuasive diplomacy; awarded **Best Delegate** at multiple conferences including CISMUN.

Debating & Elocution

- Participated in inter-school debates, enhancing persuasive communication.
 - Advocated for cybersecurity policies, improving technical articulation.
-

Career Goals

- **Short-Term:** Secure internships at multinational companies to gain experience in secure ML deployments and cybersecurity audits.
 - **Long-Term:** Build AI-driven systems with robust cybersecurity frameworks ensuring data integrity and safety.
-

Personal Attributes

Integrity-driven • Balances perfection with efficiency • Thrives under pressure • Adapts quickly • Embraces iteration and ambiguity in problem-solving
